

# GenomeConnect

## ClinGen Patient Registry

GenomeConnect is a registry that helps you share your genetic and health information. Sharing this information will help increase our understanding of how genes affect health.

GenomeConnect is open to anyone who has had genetic testing, is considering genetic testing, or is a family member of someone who has had testing regardless of health history or genetic test results.

Sign-up online at  
[www.genomeconnect.org](http://www.genomeconnect.org)

- Upload a copy of your genetic testing report(s) to your GenomeConnect account.
- Take a picture using a smart phone or scan and upload them. Be sure to include all pages and all four corners of each page.

Consent to participate and share your health history by completing the online GenomeConnect survey.

- Connect with other participants based on gene, diagnosis, or US State.

- Hear about other relevant research opportunities.
- Potentially receive updates about your genetic test results.
- Contribute to understanding of genetics.
