

Start Date	End Date	Your Name	Do you work for a laboratory that offers fee-for-service testing related to the work of your Expert Panel?	Have you made substantial contributions to the literature implicating a gene: disease relationship that relates to the work of your Expert Panel?	If yes, please list the genes:	Do you have any other existing or planned independent efforts that will potentially overlap with the scope of your ClinGen work? If so, please describe and also send an email describing the project(s) to the co-chairs and coordinator:	Please disclose any other relevant conflicts of interest (e.g. patents, intellectual property ownership, or paid consultancies related to any variants or genes associated with the work of your Expert Panel):

2018-05-03 16:27:13	2018-05-03 16:33:08	Obi Griffith	No	No	<p>There is some overlapping work on VHL curation that has occurred in CIViC, a knowledgebase that I co-founded and manage. This is mostly focused on somatic variation but has also included substantial germline variation for VHL. Part of the idea of joining the ClinGen VHL group would be to limit redundant effort and/or harmonize this effort so that work we do in CIViC is complementary/supporive of ClinGen and not in direct competition.</p>	<p>I also serve on the Board of Directors of the Cancer Genomics Consortium. There is no specific VHL activity to my knowledge at CGC but there are some general overlapping interests so I mention it here in the interests of full disclosure.</p>
2018-05-02 11:47:59	2018-05-02 11:50:34	Malachi Griff	No	No	<p>I am one of the co-creators of the CIViC (civicdb.org) resource where we primarily curate somatic variant interpretation but also support some aspects of germline variant interpretation (cancer only).</p>	None

						I do curation for the Clinical Interpretations of Variants in Cancer (CIViC) project. I am also about to start an LGG fellowship (July 2018) which will likely have different requirements.
